- 6. An agency's justification and reason why a rule should be made, amended, repealed, or renumbered, to include an explanation about the rulemaking:**

An exemption from Executive Order 2019-01 was provided for this rulemaking by Hunter Moore, Natural Resource Policy Advisor, Governor's Office, in an email dated July 29, 2015.

The Arizona Game and Fish Commission proposes to amend its Article 8 rules, governing wildlife areas and other Department-managed properties, to enact amendments developed during the preceding Five-year Review.

Under Title 41, Chapter 6, pursuant to section 41-1005(A)(1) the Commission has the authority to pursue exempt rulemaking to related to the use of public works under the jurisdiction of an agency when the effect of the order is indicated to the public by means of signs or signals. Public works means public facilities and improvements financed by the government for the public good. Wildlife areas are comprised of lands owned or leased by the Commission, federally-owned lands of unique wildlife habitat where cooperative agreements provide wildlife management and research implementation, and any lands with property interest conveyed to the Commission through an approved land use agreement, where said property interest is sufficient for management of the lands consistent with the objectives of the wildlife area. Wildlife areas are intended to conserve and protect wildlife and to provide public recreational opportunities. Wildlife areas provide a benefit to the general public by providing quality space for people to recreate and, when authorized by Commission Order, hunt and fish. In addition, these activities and public visitation can draw people into local communities and businesses, positively impacting local economies. The proposed amendments are intended to promote and maintain public safety and protect and enhance Arizona's diverse wildlife.

**For R12-4-801 General Provisions**, the objective of the rule is to establish the purposes for wildlife areas, to specify the types of Commission-owned or -managed property that may be designated as a wildlife area, and to notice the public of restrictions that apply to each specific wildlife area. The rule provides protections to Commission-owned and -managed wildlife areas and other properties, while maximizing public access and use of the same properties. Wildlife areas are intended to conserve and protect wildlife and provide public recreational opportunities; regulations and restrictions are developed through a public process. Other types of properties, such as the headquarters facility and regional offices, are typically used to conduct Department business and are not directly used for public recreation. The Commission proposes to amend R12-4-801 to clarify it is unlawful for a person to access or use any wildlife area or facility in violation of any Department actions when signs are posted providing notice of the restrictions.

In addition, the Commission proposes to clarify that the rule also applies to Commission-managed property.

**For R12-4-802. Wildlife Area and Other Department Managed Property Restrictions**, the objective of the rule is to establish the restrictions applicable to the use of wildlife areas and other Commission property. The rule provides protections to Commission-owned and -managed wildlife areas and other properties, while maximizing public access and use of those properties. Wildlife areas are intended to conserve and protect wildlife and to provide public recreational opportunities. Wildlife areas are comprised of lands owned or leased by the Commission, federally-owned lands of unique wildlife habitat where cooperative agreements provide wildlife management and research implementation, and any lands with property interest conveyed to the Commission through an approved land use agreement, where said property interest is sufficient for management of the lands consistent with the objectives of the wildlife area. Wildlife areas provide a benefit to the general public by

providing quality space for people to recreate and, when authorized by Commission Order, hunt and fish. In addition, these activities and public visitation can draw people into local communities and businesses, positively impacting local economies.

The Commission proposes to amend R12-4-802 to increase consistency between wildlife areas as follows:

The Commission proposes to allow fires in designated areas wherever practical. Fires are prohibited to protect human life, property, and natural resources in areas where high fuel loads exist or the wildlife.

The Commission proposes to allow firewood cutting or gathering for noncommercial onsite use only wherever practical. Firewood cutting and gathering is prohibited in areas that do not support appreciable quantities of utilizable wood, with the possible exception of riparian tree species that are of high wildlife value. Due to the limited quantity of utilizable wood, the value of riparian tree species to wildlife, and the value of woody debris to stream channel function, the Commission proposes to prohibit firewood cutting or gathering on the wildlife area.

The Commission proposes to allow overnight public camping wherever practical. In addition, the Commission proposes to establish that wherever overnight public camping is allowed, persons may camp for up to 14 days within any 30-day period.

The Commission proposes to allow motorized big game retrieval wherever hunting for big game is permitted, where big game animals are present in or near the wildlife area, and the surrounding habitat lends itself to off-road motorized big game retrieval. Big game retrieval is prohibited in areas where wildlife, wildlife habitat, crop production, or research activities may be harmed by cross country travel.

The Commission proposes to allow hunting and fishing wherever practical, when authorized by Commission Order. The use of firearms for the purpose of taking wildlife is prohibited when the wildlife area is not conducive to the use of firearms due to its proximity to populated areas or occupied dwellings.

The Commission proposes to establish three new wildlife areas and their associated restrictions: Arivaca Lake, Coal Mine Spring, and Manhattan Claims. Those restrictions are listed below.

For Alamo Wildlife Area, the Commission proposes to allow overnight public camping in the wildlife area outside of Alamo State Park for no more than 14 days within a 30-day period to increase consistency between wildlife area camping restrictions.

For Allen Severson Wildlife Area, the Commission proposes to remove the prohibition on open fires, firewood cutting and gathering, and overnight public camping as a thorough review of the current Memorandum of Agreement does not provide the Commission the authority to enforce restrictions beyond those related to hunting and fishing.

For Aravaipa Wildlife Area, the Commission proposes to remove the motorized travel restriction as a thorough review of the current Memorandum of Agreement does not provide the Commission the authority to enforce restrictions beyond those related to hunting and fishing.

For Arivaca Wildlife Area, the Commission proposes to establish the following restrictions for this new wildlife area: restrict open fires allowed to designated areas only; limit wood collecting to dead and down material for onsite noncommercial use only; allow overnight public camping in designated areas only, for no more than 14 days within a 30-day period; permit motorized vehicle travel on designated roads or areas only, except for big

game retrieval (this restriction does not apply to Department authorized vehicles or law enforcement, fire response, or other emergency vehicles when conducting official duties); and open the wildlife area to all hunting in season as permitted under R12-4-304 and R12-4-318.

For Base and Meridian Wildlife Area, the Commission proposes to prohibit the use of centerfire rifled firearms because the terrain of the Wildlife Area does not allow for the safe discharge of a centerfire rifled firearm, meaning the wildlife does not have natural berms such as mountain or hills to stop the trajectory of a bullet. This will increase consistency between other wildlife areas, such as Arlington and Powers Butte Wildlife Areas. However, the wildlife area does allow for the safe discharge of shotguns shooting shot and rimfire rifled firearms. In fact, the Department hosts camps and activities at the wildlife areas to promote small game hunting, waterfowl hunting, and clay target shooting (limited to shotguns and rimfire rifled firearms).

For Becker Lake Wildlife Area, the Commission proposes to prohibit firewood cutting and gathering due to the limited quantity of utilizable wood, the value of riparian tree species to wildlife, and the value of woody debris to stream channel function.

For Bog Hole Wildlife Area, the Commission proposes to remove the rule restrictions for open fires, collecting wood and camping because the current land use agreement with the U.S. Forest Service (USFS) does not provide the Commission the authority to enforce restrictions beyond those related to hunting and fishing.

For Chevelon Canyon Ranches Wildlife Area, the Commission proposes to prohibit recreational shooting due to the presence of nesting waterfowl, the cultural resources present on the wildlife area, and the small size of the parcels comprising this wildlife area. The Commission proposes to allow open fires in designated areas within the Wold and Tullman parcels. The Commission proposes to allow wood collecting limited to dead and downed material for onsite noncommercial use facilitate the clean-up of the wildlife area at no cost to the Department. The Commission proposes to allow overnight public camping in designated areas within the Tillman parcel due to the lower habitat value associated with the meadow habitat. The Commission proposes to prohibit target and clay bird shooting due to the small size of these parcels, the high production and palatability of forage produced, and the added disturbance to wildlife that would result from the repeated discharge of firearms.

For Chevelon Creek Wildlife Area, The Commission proposes to prohibit motorized big game retrieval on the wildlife area due to the high concentration of cultural resources present throughout the wildlife area, it is determined that cross country travel is counterproductive to the Department's responsibility to protect wildlife habitat and existing cultural resources. The Commission also proposes to prohibit target shooting on the wildlife area due to the presence of nesting waterfowl and the potential for vandalism and unintentional damage to prehistoric resources.

For Cibola Wildlife Area, the Commission proposes to remove the restriction regarding the take of wildlife with a firearm to provide the Commission with greater flexibility when considering Hunt Orders.

For Clarence May and C.H.M. May Memorial Wildlife Area, the Commission proposes to remove the restriction on discharging firearms. Because the deed allows for predator hunts when authorized by Commission Order, the restriction prohibiting the use of firearms on the wildlife area is confusing to the public.

For Cluff Ranch Wildlife Area, the Commission proposes to reduce the 45-day period overnight public

camping limitation to a 30-day period to increase consistency between wildlife area camping restrictions.

For Coal Mine Spring Wildlife Area, the Commission proposes to establish the following restrictions for this new wildlife area: allow overnight public camping for no more than 14 days within a 30-day period; prohibit motorized vehicle travel on the wildlife area (this restriction does not apply to Department authorized vehicles or law enforcement, fire response, or other emergency vehicles when conducting official duties); and open the wildlife area to all hunting in season as permitted under R12-4-304 and R12-4-318.

For Colorado River Nature Center Wildlife Area, the Commission proposes to prohibit the discharge of firearms due to high public use of the wildlife area and public safety concerns.

For Fool Hollow Lake Wildlife Area, the Commission proposes to prohibit the discharge of firearms due to the close proximity to private lands, a public school, and the small size of the wildlife area.

For House Rock Wildlife Area, the Commission proposes to restrict members of the public to enclosed vehicles when within ¼ mile of the bison herd for public safety purposes and to prevent the public from disturbing the bison herd.

For Jacques Marsh Wildlife Area, the Commission proposes to remove this wildlife area from the rule as a thorough review of the current cooperation and management memorandum of understanding between the Commission, Pinetop-Lakeside Sanitary District, and USFS does not provide the Commission the authority to enforce restrictions beyond those related to hunting and fishing. After this amendment the only restriction that would remain in effect is the ability to allowing hunting on the wildlife area; since statute provides the Commission with the authority to manage hunting and fishing throughout the state, it is unnecessary to include the wildlife area in this rule.

For Lamar Haines Wildlife Area, the Commission proposes to prohibit open fires due to the high fuel loads and high fire risk on this wildlife area. While access into the property is gained by foot and the primary uses for this wildlife area include hiking, sightseeing, and photography, the Commission proposes to allow overnight public camping for no more than 14 days within a 30-day period.

For Lower San Pedro Wildlife Area, the Commission proposes to reduce the 45-day period overnight public camping limitation to a 30-day period to increase consistency between wildlife area camping restrictions.

For Manhattan Claims Wildlife Area, the Commission proposes to establish the following restrictions for this new wildlife area: limit wood collecting to dead and down material for onsite noncommercial use only; allow overnight public camping for no more than 14 days within a 30-day period; and permit motorized vehicle travel on designated roads or areas only, except for big game retrieval (this restriction does not apply to Department authorized vehicles or law enforcement, fire response, or other emergency vehicles when conducting official duties).

For Mittry Lake Wildlife Area, the Commission proposes to increase the time-frame for overnight public camping limitation to 14 days within a 30-day period to increase consistency between wildlife area camping restrictions; the current restriction is 10 days per calendar year. The Commission proposes to prohibit all towed water sports due to public safety concerns and to prevent these water sports from disturbing wildlife.

For Planet Ranch Wildlife Area, the Commission proposes to reduce the 45-day period overnight public camping limitation to a 30-day period to increase consistency between wildlife area camping restrictions. The Commission proposes to close posted portions of the wildlife area to public entry to protect the Multi-species Conservation Program's conservation area that is part of the native fish augmentation program.

For Powers Butte Wildlife Area, the Commission proposes to restrict motorized travel within the agriculture and crop production areas.

For Raymond Wildlife Area, the Commission proposes to allow open fires in designated areas only as this activity is compatible with camping in designated sites. The Commission proposes to restrict members of the public to enclosed vehicles when within ¼ mile of the bison herd for public safety purposes and to prevent the public from disturbing the bison herd. The Commission proposes to remove the public entry sign-in requirement for the wildlife area. The Commission believes requiring members of the public to sign in is no longer necessary now that members of the public are required to remain in an enclosed vehicle when within one quarter mile of the bison herd.

For Roosevelt Lake Wildlife Area, the Commission proposes to prohibit target shooting due to the presence of nesting waterfowl.

For Santa Rita Wildlife Area, the Commission proposes to remove language regarding the use of motor vehicles as the cooperation and management memorandum of understanding between the Commission, University of Arizona, and Arizona State Land Department expired and the Commission does not have the authority to enforce the restriction. The Commission proposes to remove the restriction regarding the take of wildlife with a firearm from March 1 through August 31 to provide the Commission with greater flexibility when considering Hunt Orders.

For Sipe White Mountain Wildlife Area, the Commission proposes to allow open fires in designated areas only as this activity is compatible with camping in designated sites. The Commission proposes to allow camping in designated areas only to avoid conflicts with other users and the Department's wildlife and habitat management goals. During the summer months, there is high public use, primarily by non-consumptive users who come to view wildlife, hike, picnic, and enjoy nature in a relatively quiet setting.

For Sunflower Flat Wildlife Area, while access into the property is gained by foot and the primary uses for this wildlife area is wildlife viewing and photography, the Commission proposes to allow overnight public camping in designated areas only, for no more than 14 days within a 30-day period.

For Three Bar Wildlife Area, the Commission proposes to remove the hunting restriction for the Walnut Canyon Enclosure to provide the Commission with greater flexibility when considering Hunt Orders.

For Tucson Mountain Wildlife Area, the Commission proposes to remove the motorized vehicle travel restriction because it overlaps management authority with the City of Tucson and Pima County and is confusing to members of the public. The Commission proposes to reference closures that are identified in the Department's online check-in system. The system provides a map of area closures implemented by Pima County Natural Resources, Parks and Recreation. The Commission proposes to prohibit the use of pre-charged pneumatic weapons due to public safety concerns.

For Upper Verde River Wildlife Area, the Commission proposes to remove the requirement all dogs must remain on leash except for hunting dogs during a legal open season because the wildlife area is no longer experiencing issues resulting from dogs being off their leash.

For Wenima Wildlife Area, the Commission proposes to prohibit target shooting due to public safety concerns. During the summer months, there is high public use, primarily by non-consumptive users who come to view wildlife, hike, picnic, and enjoy nature in a relatively quiet setting.

For White Mountain Grasslands Wildlife Area, the Commission proposes to prohibit wood collecting since there are only a few relatively small areas within the wildlife area that support appreciable quantities of utilizable wood, with much of the wood being inaccessible from the available road network. The Commission proposes to allow target shooting in designated areas only due to the large size of the property, the homogeneity in habitats, and habitat conditions and values with adjacent lands, and the relatively light public use of the property.

For White Water Draw Wildlife Area, the Commission proposes to prohibit open fires, unless authorized by the Department, and wood collecting due to the high fire danger and lack of fire control options at this wildlife area.

For Willcox Playa Wildlife Area, the Commission proposes to allow wood collecting limited to dead and downed material for onsite noncommercial use facilitate the clean-up of the wildlife area at no cost to the Department. The Commission proposes to prohibit motorized big game retrieval because there is no motorized access to this wildlife area.

**For R12-4-803. Wildlife Areas and Other Department Managed Property Boundary Descriptions**, the objective of the rule is to provide the legal boundary descriptions for wildlife areas and Commission-owned properties.

The Commission proposes to amend R12-4-803 to establish boundary descriptions for the newly established wildlife areas: Arivaca Lake, Coal Mine Spring, and Manhattan Claims.

For Jacques Marsh, the Commission proposes to remove this wildlife area from the rule because the cooperation and management memorandum of understanding between the Commission, Pinetop-Lakeside Sanitary District, and USFS does not give the Commission the authority to regulate its use.

The Commission believes the Article 8 rules do not impose any direct or indirect costs on the regulated community, other state agencies, political subdivisions, private business, or the public.

The Commission believes the rules do not impose any costs to agencies or political subdivisions of this state directly affected by the implementation and enforcement of the rules, and does not impose any additional costs or reduction in revenues to businesses (large or small). The Department believes the rules have no effect on the revenues or payroll expenditures of employers in the state. The rules have resulted in minimal administrative costs to the Department. The Department has determined that the benefits of the rules outweigh any costs.

The Commission has determined the probable benefits of the rules within this state outweigh the probable costs of the rulemaking and, once the proposed amendments indicated in this rulemaking are made, the rules will impose the least burden and costs to persons regulated by Article 8 rules, including paperwork and other compliance costs necessary to achieve the underlying regulatory objective.

- 7. A reference to any study relevant to the rule that the agency reviewed and proposes to either rely on or not rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:**

The agency did not rely on any study in its evaluation of or justification for the rule.

- 8. A showing of good cause why the rule is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:**

Not applicable

- 9. The summary of the economic, small business, and consumer impact, if applicable:**

Exempt under A.R.S. § 41-1005(A)(1).

- 10. A description of the changes between the proposed rules, including supplemental notices, and the final rulemaking package (if applicable):**

To be determined

- 11. A summary of the public stakeholder comments made about the rulemaking and the agency response to the comments, (if applicable):**

- a. Whether the rule requires a permit, whether a general permit is used, and if not, the reason why a general permit is not used:**

The rule does not require the issuance of a regulatory permit, license, or agency authorization.

- b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law, and if so, citation to the statutory authority to exceed the requirements of federal law:**

Federal law is not applicable to the subject of the rule.

- c. Whether a person submitted an analysis to the agency that compares the rule's impact on the competitiveness of business in this state to the impact on business in other states:**

The agency did not receive an analysis.

- 13. A list of any incorporated material and its location in the rule:**

Not applicable

- 14. Whether the rule was previously made, amended, repealed, or renumbered as an emergency rule? If so, shall state where the text changed between the emergency and exempt rulemaking packages:**
