

SAFER FOR YOU SAFER FOR PATIENTS

OVERSIZED PUILOMETER BREATH SHIELD - \$12.00

Protect your patients and yourself using this pupilometer breath shield. This oversized shield measures 9" x 8" and fits most pupilometers. Order today using part number #456A3

Additional tips to help you minimize exposure:

- Re-visit and update your disinfection techniques
- Whenever possible, encourage patients to come alone to their appointments
- For disinfection ease/effectiveness, migrate all documentation from paper to digital
- Remove chin rest papers to facilitate disinfection techniques
- Eliminate magazines and other soft-surface reading materials from your reception areas
- Discuss a revised patient flow procedure with your staff, minimizing wait times in enclosed spaces. This may include implementing a text protocol for appointment notifications: ask your patients to wait in their car until notified via text message, rather than the waiting room/reception area.
