

Telecommunications Technology Opportunities

Immediate Opportunities

We are currently recruiting for individuals with previous experience in Technologies, Telecommunications, or Electrical Engineering. Qualified individuals need to understand electronics, electricity, or cabling. Duties to include: Verifying serial numbers and testing equipment per visual aid and then packaging up via instructions. You will be working with AT&T refurbished components and attention to detail is critical as well as following process flows. In this role you will be working with many pieces of equipment and smaller components. You will be responsible for checking material is complete, that there are no missing screws cables or parts and checking to make sure no apparent damage to exterior of equipment. All equipment must be cleaned and any dirt, debris or tape markings not in the original OEM configuration are removed. All internal cabling is neatly laced and secured and correctly labeled. Fuses are installed and of the correct size. All modules are labeled correctly and equipment that has on/off switches, buttons, breakers etc. are in the off position. Check to see that equipment is receiving the correct power source and breakers or Fuses tested for functionality. Voltage readings taken and correct and equipment powered up and showing correct color indicator on LED. Parts tested and operating within the appropriate transmitting signal strength. All results are documented on Test Data Sheet included with part packaging. These are **2nd shift: 12:00-9:00pm Monday through Friday with overtime as needed.**

How to Apply: Please forward your resume saved as a Microsoft word attachment to include both month and year on dates of employment to: kgorczyński@ultimatestaffing.com and enter **Edwardsville Test Lab** in the subject line of your email. ***Note: Only applicants with resumes will be considered.***
